

# Drugs of Abuse

Drug class	Detection Times, Brand name of prescription drug, and metabolite(s)
<b>Opiates</b>	<i>Approximate Detection Time 2.5 hours - 2 to 3 days</i>
Codeine	Tylenol® 3, Tylenol® 4 and Tylenol® 5 Morphine (metabolite)
Hydrocodone	Vicodin®, Lorcet®, Lortab®, Hycodan®, Norco® and Vicoprofen® Hydromorphone and Norhydromorphone (metabolites)
Hydromorphone	Dilaudid® Hydromorphone (metabolite)
Morphine	Avinza®, Kadian®, MS Contin®, MSIR®, Oramorph SR®, Rescose®, Roxanol® and Roxanol 100® Morphine (metabolite)
<b>Semi-Synthetic Opiates</b>	<i>Approximate Detection Time 2.5 hours - 2 to 3 days</i>
Oxycodone	Tylox®, Percocet®, Percodan®, OxyContin®, OxylR® and Roxicodone® Oxycodone; Oxymorphone and Noroxycodone (metabolites)
Oxymorphone	Opana® and Opana ER® Oxymorphone (metabolite)
Buprenorphine *	Buprenex®, Suboxone® and Subutex® Norbuprenorphine (metabolite)
<b>Synthetic Opiates</b>	<i>Approximate Detection Time 2.5 hours - 2 to 3 days</i>
Methadone	Dolophine® and Methadose® EDDP (metabolite)
Fentanyl	Actiq®, Fentora® and Duragesic® Norfentanyl (metabolite)
Meperidine	Demerol® Normeperidine (metabolite)
Tramadol	Ultram® and Ultracet® O-desmethyiltramadol (metabolite)
Tapentadol	Nucynta® and Palexia® Glucuronides (metabolite)
<b>Benzodiazepines</b>	<i>Approximate Detection Time 3 to 7 hours - 4 to 6 weeks</i>
Alprazolam	Xanax® Alphahydroxyalprazolam (metabolite)
Lorazepam	Ativan® Lorazepam (metabolite)
Nordiazepam	Metabolite of Valium®, Librium® and Tranxene® Oxazepam (metabolite)
Oxazepam	Serax®, Metabolite of Nordiazepam, Temazepam and Restoril® Oxazepam (metabolite)

**Detection times are dependent on the amount and frequency of drug use, the donor's metabolic rate, body mass, age, physical activity, overall health.**

Drug class	Detection Times, Brand name of prescription drug, and metabolite(s)
<b>Stimulants</b>	<i>Approximate Detection Time 2 to 7 hours - 2 to 3 days</i>
Amphetamine	Adderall®, Bensedrine®, Dexedrine® and Vyvanse® Amphetamine (metabolite)
Methamphetamine	Desoxyn®, Selegiline® and Vick's Inhaler®; Metabolite of Didrex® Amphetamine (metabolite)
<b>Barbiturates</b>	<i>Approximate Detection Time 2 to 4 hours - 1 to 3 weeks</i>
Amobarbital	Amytol® N-Hydroxyamobarbital (metabolite)
Butalbital	Fiorinal® and Fioricet® Butalbital (metabolite)
Pentobarbital	Nembutal® Pentobarbital (metabolite)
Phenobarbital	Belladonna®, Luminal® and Primidone® Phenobarbital (metabolite)
Secobarbital	Seconal® Secobarbital (metabolite)
<b>Muscle Relaxants</b>	<i>Approximate Detection Time 1 to 3 hours - 1 to 3 days</i>
Carisoprodol/ Meprobamate	Soma® / Equanil® and Miltown® Meprobamate (metabolite)
<b>Illicits</b>	<i>Approximate Detection Time 2 to 5 hours - 2 to 3 days</i>
Cocaine	Benzoylcegonine (metabolite)
Heroin	6-Monoacetylmorphine, Morphine, (metabolites)
Marijuana *	Marinol® Carboxy-THC (THCA) (metabolite)
Methamphetamine	D-methamphetamine isomer
Bath Salts *	Methylenedioxypropylvalerone
K2 (Spice) *	JWH-018 and JWH-073
MDMA (Ecstasy)	MDA (metabolite)
Phencyclidine (PCP)	Phencyclidine (metabolite)
<b>Alcohol</b>	<i>Approximate Detection Time 6 to 7 hours - 1 to 3 days</i>
Alcohol	EtG, EtS
Alcohol	Ethyl Alcohol
<b>Other Drugs</b>	<i>Approximate Detection Time 3 to 6 hours - 2 to 4 days</i>
Ketamine	Ketalar® Norketamine (metabolite)
Nicotine	Cotinine (metabolite)

\* **Approximate Detection Times**

Bath Salts: 2 to 4 hours - 2 to 3 days, drug makeup variable  
 Buprenorphine: 3 to 7 days  
 K2 (Spice): 5 to 7 hours - 1 to 3 days, drug makeup variable  
 Marijuana: 6 to 8 hours - 25 to 30 days, regular use to 100 days
